

## 5 chirurgiens : "le patient le plus facile à opérer : le politicien: pas de coeur, pas d'épine dorsale, pas de cran (entrailles), & leur tête est interchangeable

Five surgeons discussing who the best patients

are to operate on:

First surgeon: I like to see accountants on my operating table, because when you operate them up, everything inside them is numbered.

Second surgeon: I like electricians: everything inside them is color coded.

Third surgeon: Librarians are the best: everything inside them is in alphabetical order.

Fourth surgeon: I like construction workers: They always understand when you have a few parts leftover in the end, and when the job takes longer than said it would.

Fifth surgeon: Shuts them all up with his observation:  
"You are all wrong. Politicians are the easiest to  
operate on. There are no guts, no hearts,  
no spine and the head and butt are interchangeable.
