

L'école Artsvabert a besoin d'être reconstruite

This school was built in 1937 and is now unsafe and needs to be completely rebuilt. More than 2,700 people live in this isolated border community. This middle school houses 125 children with classes through 8th grade and is one of two schools in this growing town. A lack of basic sanitation, proper heating, and an unsafe structure creates an urgent need to rebuild this school.

To complete this project, we require \$225,000, which includes the reconstruction, new furniture, and necessary equipment.

With your involvement, we can continue to help build a strong, secure and prosperous Armenia!
