The More Things Change in America, The More They Stay the Same

By Noyan Tapan

For the 100th issue of the magazine, I have chosen a title that is both timely and relevant. The title is "The More Things Change in America, The More They Stay the Same". This title is a reference to the famous quote by Mark Twain, which is a commentary on the changes in American society over time. The quote is a reflection on the fact that while the surface of things may change, the underlying nature of things often remains the same. This is a theme that is particularly relevant in today's world, where change is constant and rapid. The title is a commentary on the changes in American society over time, and it is a reflection on the fact that while the surface of things may change, the underlying nature of things often remains the same. This is a theme that is particularly relevant in today's world, where change is constant and rapid.
