Numéro de réunion : 538 832 2794
Mot de passe : 381750

Au cours des 30 dernières années, l'Institut ARPA a travaillé en Arménie en fournissant une expertise, une analyse, une recherche et une planification, en créant et en mettant en œuvre divers projets dans les domaines de la santé, de l'éducation, de la science, de la technologie, de l'économie et d'autres domaines, ainsi qu'en faisant don d'instruments scientifiques à divers instituts, et les universités et écoles. En outre, au cours des 15 dernières années, l'Institut ARPA a organisé des centaines de conférences, de séminaires, de tables rondes et de conférences communautaires gratuits réunissant des personnes partageant les mêmes idées pour entendre des experts et des scientifiques, tous œuvrant pour le mieux-être de l'Arménie. Pour continuer les activités de l'ARPA en Arménie et garder ces conférences gratuites pour tous, veuillez soutenir le travail de l'ARPA, en faisant un don généreux.
Participation gratuite - Don suggéré d' au moins 50 \$ .

ARPA Institute Zoom Panel Discussion
On "Modernization of Healthcare in Armenia"
By Armine Lulejian, Davit Sargsyan, Arsene Mekinian & Avet Manukyan
Saturday, December 18, 2021 @ 10:00am, PDT
Abstract: The citizens of Armenia should be at the heart of a health and wellbeing model that is human by design, trustworthy and knowledge-driven. The focus should be on the specific needs of the individual and requires a new way of thinking about all the elements of health and wellbeing. Expectations are now higher than ever on secure access to health information, easy to understand and pay medical bills. Hence to design and implement a dependable digital health strategy is essential to any modern society. The tools to empower workforce, automate data, streamline operations, as well as simplify and improve the healthcare experience is of paramount importance. The advantages are reduced costs, new forms of value-added benefits to individuals and gathering big data in minimal time for conducting epidemiological studies, research, clinical trials, or meta-analysis. Healthcare professionals can stay on top of cutting-edge techniques and trends and identify risk factors. Discussed will be the ways and means of creating and implementing an effective digital healthcare system in Armenia.
Armine Lulejian is serving as Program Director for the Avelis Health Informatics Training program in Armenia. Dr. Lulejian is Senior Director of Educational Initiatives for the USC MESH Academy, Associate Director of Informatics Education Core with USC Clinical Translational Sciences Institute, and Clinical Assistant Professor in Population and Public Health Sciences at the Keck School of Medicine of USC. Dr. Lulejian has launched doctoral and masters training programs in Biomedical Informatics at NYU School of Medicine. Dr. Lulejian teaches undergraduates, graduates and medical students at USC Iovine and Young Academy and USC Keck School of Medicine. Dr. Lulejian was the lead researcher on patient and provider surveys with the first community electronic health project in the United States at New York City Department of Health and Mental Hygiene. She has a Ed.D. and MS in education from Columbia University Teachers College, an MPH in epidemiology from UCLA, and BA in Psychology, with minor in Near Eastern Studies at UCLA. She is a certified health education specialist and emergency care technician.
Davit Sargsyan is a Principal Statistician in the Translational Medicine and Early Development Statistics group at Janssen PRD (J&J), a researcher at the Cardiovascular Institute of New Jersey (RWJ Medical School, Rutgers), and currently completing his doctoral in Pharmaceutics at Rutgers School of Pharmacy. Davit earned his MS degree in 2011 from the statistics department at Rutgers University. His main areas of interest are drug development, epidemiological research, advanced statistical techniques including multidimensional data analysis and machine learning, genomics and genomics data analysis and visualization (microarray, RNA-seq and DNA methylation data), and studying the role of microbiome in modulating human immune system.
Arsene Mekinian is Professor of Medicine at Sorbonne University and specialist of autoimmune diseases with main interest in systemic sclerosis pathophysiology. He has a lab on the crosstalk of B and Tm lymphocytes and is the president of MINHEMON and VEXAS, which are specialized on management and research of immunohematological diseases. Arsene is the founder and president of Sainte-Anne's French-Armenian medical collaborative group which founded a Clinical Research Center in Erevan, approved by french APHP hospitals and opened several medical centers collected by diaspora doctors, such as in clinical immunology and rehabilitation in Erevan and Goris.
Avet Manukyan is the executive director of the "National eHealth Operator" CJSC and the founder of the "SYLEX SA" (Switzerland). He has 25 years of experience in architecting and developing enterprise solutions and massive scale technology systems for national level (Government) E-health, Credit Bureau, Courts Automation and for insurance carriers. Manukyan has also patented algorithms for processing of digital signals (UK), etc. He has a PhD in Computer and Data Sciences from the National Polytechnic University of Armenia (NPUA). He also has Medical Informatics credentials from Erasmus University in Rotterdam (Netherlands), Medical Expert Systems research program certificate from National Technical University of Athens (Greece) and has been a lecturer in NPUA.
