

Quand un Ouzbek reecrit l'Histoire , et un Armenien trouve le surnom d'Ataturk

"L'historien ouzbek, Şohret Barlas a déclaré qu'il a examiné les archives liées aux allégations

arméniennes de genocide dans plus de 30 bibliothèques à travers le monde et, personnel salarié de

Turquie, n'a trouvé aucune preuve de génocide.

Barlas a fait des recherches sur les activités de la FRA dans le Caucase, en Anatolie et dans

d'autres pays, pendant 31 ans et a écrit huit livres et de nombreux articles constatant les

affirmations fallacieuses des Armeniens qui n'ont jamais été soutenues par des scientifiques

impartiaux.

L'historien ouzbek affirme que les Arméniens n'ont pas été tues le 24 avril 1915 (l'auteur confond

une periode avec un jour, note du redacteur) par contre ses documents étudiés montrent que les organisations

terroristes Hntchak et Tachnak ont pris l'offensive pour frapper l'armée ottomane dans la dos.

En plus de cela, les Arméniens, une révélation historique, ont tué 35,000 personnes dans la vallée

de Ferghane, (à l'est de l'Ouzbékistan. **a plus de 4,000km** de Van ou d'Erzuroum, note du rédacteur).

En 1918, la République autonome du Turkestan a été effondrée par les Bolcheviques avec l'aide

de 10,000 wagons de militants tachaks qui y avaient été emmenés."

source : [aa .com.tr](http://aa.com.tr) ,25/4/2023 (Agence Anatolie)

Il reste à dénicher les preuves des brutalités tachaks en Asie Centrale.

Soulignons que Şohret Barlas a étudié à la Faculté d'Histoire d'Ankara qui est un des

départements de l'Université de Langue, d'Histoire et de Géographie, (DTCF en turc) fondée par Atatürk.

La tâche spécifique de l'établissement était l'ambition d'Atatürk d'y élaborer la théorie du

"langage solaire" qui **prétend la langue turque être l'origine de toutes les langues**"

Cette théorie est foncièrement raciste et la DTCF, fondée en 1935 a ouvert ses portes aux

scientifiques allemands fuyant le fascisme.

Rappelons que le premier Secrétaire de la Société de la langue turque au sein de l'Université était

un Arménien, Agop Martayan .En 1934 après l'adoption de la **loi des "Nom de famille"**, Atatürk

lui a donné un nom à connotation turque de Dilacar qui signifie "celui qui ouvre langue".

En Turquie le peuple ignore l'origine arménienne de A.Dilacar qui a conçu le nom d'Ataturk qui

signifie le premier ou le père des Turcs comme Staline l'était aux Soviétiques .

Zaven Gudsuz zaven471@hotmail.com (ancien élève des collèges mekhitaristes d'Istanbul et de Sevres)

diplôme d'économie de l'Université de Nantes en France

Agop **Martayan**
Dilaçar ([Constantinople](#), [22 mai 1895](#) - [Istanbul](#), [12 septembre 1979](#)) était un [linguiste](#) arménien de [Turquie](#) qui s'est spécialisé dans les [langues turques](#) , et le premier secrétaire général et spécialiste en chef de l'[Association de la langue turque](#)^{1,2}.

Biographie

Agop Dilaçar est né à [Istanbul](#), sous le nom **Agop Martayan**, en 1895. Il est diplômé du [Robert College](#) en 1915. En plus de l'[arménien](#) et du [turc](#), il connaissait l'[anglais](#), le [grec](#), l'[espagnol](#), le [latin](#), l'[allemand](#), le [russe](#) et le [bulgare](#). Il a travaillé comme lecteur d'anglais au Robert College, et d'[ottoman](#) et de langues orientales anciennes à l'[université de Sofia](#), en [Bulgarie](#).

Il a été invité le [22 septembre 1932](#), en tant que linguiste au *Premier Congrès de langue turque* qui avait lieu au [Palais de Dolmabahçe](#) et qui était supervisé par [Mustafa Kemal Atatürk](#), fondateur et premier président de la [république de Turquie](#), ainsi que deux autres linguistes d'origine arménienne, İstepan Gurdikyan et Kevork Simkeşyan. Il a poursuivi son travail et ses recherches sur le [turc](#) en tant que spécialiste en chef et Secrétaire général de la nouvellement créée [Association de la langue turque](#) à [Ankara](#). À la suite de la [Loi sur les noms de famille](#) en 1934, Atatürk lui a suggéré de prendre le nom de *Dilaçar* (signifiant

littéralement *ouvreur de langue*), qu'il a accepté.

Il a enseigné l'histoire de la langue à l'[université d'Ankara](#) entre 1936 et 1951. Il était aussi le conseiller en chef de *Türk Ansiklopedisi* (*Encyclopédie turque*), entre 1942 et 1960. Il a occupé son poste et continué ses recherches en linguistique à l'Association de la langue turque jusqu'à son décès en 1979.

« Avec l’instauration de la République turque en 1923 et les réformes linguistiques initiées par Mustafa Kemal en 1928, la langue subit une transformation radicale : elle ne sera plus écrite en alphabet arabe mais en latin, et elle sera purifiée de son vocabulaire arabe et persan. En même temps, il ne serait plus appelé turc ottoman mais simplement turc. Un comité linguistique a été créé pour adapter l’écriture latine aux exigences phonétiques du turc, résultant en un nouvel alphabet de 29 lettres. Le scénario a été fondé par un Arménien, Hagop Martayan (1895-1979). »

Agop Dilâçar ([Armenian](#): Յակոբ Մարթայեան **Hagop Martayan**, [Istanbul](#), 22 May 1895 - Istanbul, 12 September 1979) was a Turkish-Armenian [linguist](#) who specialized in [Turkic languages](#) and the first Secretary General and head specialist of the [Turkish Language Association](#). He created the Latin-based modern Turkish alphabet ^{[1][2]} ^[3] and was proficient in 12 languages,^[4] and in addition to [Armenian](#) and [Turkish](#), Dilâçar knew [English](#), [French](#), [Greek](#), [Spanish](#), [Azerbaijani](#), [Latin](#), [German](#), [Russian](#) and [Bulgarian](#).

Biography

[Armenian](#) Agop Dilâçar was born **Hagop Martayan** in [Constantinople](#) in 1895. His father was Vahan Martayan and his mother Eugenie Martayan (née Sarafian). He studied English in the local American School editing the school's publication "School News" (1907). In 1910, Dilâçar studied at the [Robert College](#) where he also learned German, Latin and Classical Greek, graduating from Robert College in 1915. After completing his studies, he served as an officer in the [Ottoman Army](#)'s Second Division in [Diyarbakır](#). Dilâçar was awarded for his bravery and continued serving in the Ottoman Army reserves. Because of his knowledge of English, he worked as a Turkish Army interpreter for the British prisoners of war held after the [Siege of Kut](#) south of Baghdad. Dilâçar was arrested and escorted to Damascus for alleged secret extrajudicial contacts with the British prisoners. In Damascus, he was introduced for the first time to [Mustafa Kemal Pasha](#) (later known as Atatürk). Mustafa Kemal Pasha was then the Commander of the Ottoman Army's Seventh Division. Mustafa Kemal was impressed by Dilâçar's intelligence and secured a pardon for him and took him into his headquarters.

In 1918, Dilâçar moved to Lebanon, where he became the headmaster of Beirut's

Sourp Nshan Armenian National School. In Lebanon, he established *Louys*, an Armenian periodical (in [Armenian](#) *Lnju*, meaning The Light). In 1919, he returned to Istanbul where he worked as a lecturer of English at the Robert College. In 1922, he married Méliné Martayan and the couple moved to Bulgaria where he taught [Ottoman Turkish](#) and ancient East languages at [Sofia University](#) in [Sofia, Bulgaria](#). In Sofia he also published the Armenian weekly *Mshagouyt* (in Armenian Մշակույթ, meaning Culture) and the monthly Armenian periodical *Rahvira* (in Armenian Ռահվիրայ).

Dilâçar published a study of Turkish language in Istanbul's *Arevelk* (in [Armenian](#) Արեւելք, meaning The East). A translated copy of the article gained the attention of [Mustafa Kemal Pasha](#) who invited him to return to Turkey where he lectured in Faculty of Languages, History and Geography.

On 22 September 1932, Dilâçar was invited as a linguist to the First Turkish Language Congress held in [Dolmabahçe Palace](#) supervised by Atatürk, the founder and first president of the [Republic of Turkey](#), together with two other linguists of Armenian ethnicity, İstevan Gurdikyan and Kevork Simkeşyan. He continued his work and research on the [Turkish language](#) as the head specialist and Secretary General of the newly founded [Turkish Language Association](#) in [Ankara](#). Following the issue of the Law on Family Names in 1934, Mustafa Kemal Pasha suggested him the surname *Dilaçar* (literally meaning *language opener*), which he gladly accepted. Nevertheless, he continued to use the surname Martayan to sign his articles in the Armenian language. In return, Agop Martayan openly proposed the name *Atatürk* to Mustafa Kemal Pasha in the [Grand National Assembly of Turkey](#).^[5]

Dilâçar taught history and language at [Ankara University](#) between 1936 and 1951. He also was the head adviser of the *Türk Ansiklopedisi* (*Turkish Encyclopedia*), between 1942 and 1960. He held his position and continued his research in linguistics at the Turkish Language Association until his death on 12 September 1979, in Istanbul.

Armenian publications

In addition to his work in Turkish language, Dilâçar also published in Istanbul's Armenian media, in particular with the Armenian daily [Marmara](#) (in Armenian

Մարմարա).

In 1922, Dilâçar published his literary work *Aratchin Portsutyun* (in Armenian «Առաջին Փորձուժիւն» meaning First Try). Also in 1922, he translated Armenian playwright [Levon Shant](#)'s play *Hin Asdvadzner* (in Armenian «Հիւսսովածներ» meaning Old Gods) to English. In 1929 he published his Armenological study "Kri Dzakoume yev Daradzoume" (in Armenian «Գրիծագոււմը և տարածոււմը» meaning the origin and spread of language) and in 1929 "Hapetapanoutyun" (in Armenian «Հաբեթաբանութիւն») in addition to an Armenian translation of a collection of English poetry under the title *Albyoni Bardezen* (in Armenian «Ալբիոնի պարտեզէն» meaning from the garden of Albion) also in 1929.

In 1951, Dilâçar published his book *Hazar Hink Harur Amyagi Khoher* («1500ամեակի խոհեր» - meaning Thoughts on the 1500th Anniversary). In 1956 he published his book *Asdvadzashountche yev Ashkharhapare* (in Armenian «Աստուածաշունչը եւ Աշխարհաբարը» meaning The Holy Bible and Modern Armenian language).

Dilâçar had numerous written works in linguistics, literature, studies and translations in Armenian. For example his literary work *Salin Vra (Kragan Portser)* (in Armenian Սալին Վրայ (գրական փորձեր), a collection of poems *Khonchadz Yerazner* (in Armenian «խոնջած երազներ»), a theatrical piece *Tsaykatiter* (in Armenian «Յայգաթիթեր») and studies like "Levon Shant, Ir Pilisopayoutyune yev Kegharvesde" (in Armenian Լեւոն Շանթ` Իր Փիլիսոփայութիւնը եւ Գեղարուեստը, meaning Levon Shant, his philosophy and artistry) and "Hay Tyutsaznavebe, Pakhtadadagan Himi Vera" (in Armenian Հայ Դիւցազնավէպը Բաղդատատական Հիմի Վրայ meaning The Armenian heroic epic novel on a comparative basis).

Armenian descent

After his death in 1979, in a news coverage, the then only Turkish TV channel [TRT](#) concealed the first name "Agop", which would suggest an Armenian descent, and instead mentioned "A. Dilaçar", using only the initial of his forename together with his surname.^{[6][7][8][9]} However, in a TV program in TRT, which Dilaçar joined, his first name was pronounced and spelled as well, crediting him "Agop

Dilaçar".^[10]

Controversy

It is an issue of controversy whether Dilâçar was the person who officially proposed the surname *Atatürk* to the founder of Turkey, [Mustafa Kemal Pasha](#),^[5] or [Saffet Arıkan](#)'s "*Ulu Önderimiz Ata Türk Mustafa Kemal*" (*Our Great Leader Ata Türk Mustafa Kemal*) sentence in the opening speech of the 2nd Language Day on 26 September 1934 became an inspiration for surname *Atatürk*.^[11]
