

L'UGAB (AGBU) distribue des générateurs de grande capacité offerts par la France à des sites stratégiques en Arménie

AGBU Global Relief Fund

Special Delivery Generators for Border Communities

With the redeployment of four new state-of-the-art power generators originally destined for Artsakh during last year's blockade, vulnerable border communities in Armenia will be empowered to carry on in case the local power source is cut off due to military aggression, a fuel blockade, or natural disaster. AGBU proudly agreed to manage the delivery and installation of these high capacity backup systems, donated by concerned municipalities of France, as part of its emergency preparedness initiative to help save lives and stabilize communities in times of crisis.
